

The Valley Primary School
Class 1 Computing MTP Autumn 1 2023-2024.
Online Safety

Unit Overview:

Lessons 1 and 6 focus on important computer skills needed for safe and effective computer use and introduce some further skills concerning the use of folders, searching for files and printing. Lessons 2-5 introduce children to presentations and teach the skills needed to create a simple presentation.

While many schools have Microsoft PowerPoint, there are alternatives. Impress is part of Apache OpenOffice and is free, as is Google Slides, part of Google Drive, which is available with a gmail address. Schools with Apple computers can also use Keynote, as well as MacOs versions of PowerPoint or Impress, or Google Slides. There are simpler presentation applications designed for children which may be used, although they may not have all the features, particularly for the later units.

Knowledge / Skills & Concepts:

In this unit, the children will:

Learn some basic computer skills.

Learn how to create a presentation using software.

Assessment:**...all children should be able to:**

- Insert slides, add and type in a text box.

...most children will be able to:

- Create folders.
- Print files.
- Add images.
- Format text and text boxes.

...some children will be able to:

- Save files in an organised folder structure.
- Search for files on the computer.
- Set windows side by side.
- Format text boxes and images.

- Reorder slides and present their presentation.

Key Vocabulary:

System unit, monitor, switch, shut down, log on, log off, windows, folder, new folder.

Presentation, Microsoft PowerPoint, OpenOffice Impress, Google Slides, Apple Keynote.

New slide, slide layout, text box, format, font, colour, background, line.

Image, picture, photo, format, insert, copy, folder, network, aspect ratio.

Slide, Slide Sorter View, drag, present.

Search, print, options, date, print options, black and white, colour, selected pages, double sided.

| Learning Sequence & Objectives | Activities | Resources | | | | | | | | | | | | | | | |

To create a simple presentation with text.

Prior Learning: Children will have identified the main features of a presentation and planned their own presentation in lesson 2.

Learning Sequence

| | | |
|---|---|---|
|  | Have a Go: Ask the children to launch the presentation application, and to create their planned title slide. This will demonstrate some of what the children already know about presentation applications. |  |
|  | Slides: Demonstrate how to add slides and change the slide layout. You may wish to show the children more than one way. |  |
|  | Create Your Slides: Ask the children to create their slides for their planned presentation, choose the best layout for each slide, and type the title. Tell the children not to make their final slide. Ask the children to save the presentation into their folder. Ask the children to insert a new blank slide for their final slide. Can they work out how to add text to the blank slide? |  |
|  | Adding Text /Formatting a Text Box: Using the children who know what to do, demonstrate how to add and format a text box. |  |
|  | Your Presentation: Ask the children to make sure they have a title on each slide. Then they should start to type some text on each slide about the ideas on each slide. Give the children the chance to experiment with formatting the text and the text boxes. (It is important for children to consider the effectiveness of text fonts and styles. Children often wish to use fonts that look spectacular, which others may not find as effective). |  |
|  | Share: Allow the children to come together in pairs and review each other's presentations, paying particular attention to the formatting of font and text box. Choose one or two pairs to comment on each other's presentation to the whole class. |  |

Taskit

Format: Give the children a simple presentation to change the format of the text boxes.
Challenge: Use the **Challenge Cards** for extension activities.

Teaching slides

Lesson Pack

Laptops

Presentation software

To add and format an image.

Prior Learning: Children will have identified the main features of a presentation and started to create their own presentation in lessons 2 and 3.

Learning Sequence

| | | |
|---|--|---|
|  | What's in the picture? Ask the children to open a new presentation and try to insert an image. |  |
|  | Insert an Image /Copy and Paste an Image/Resize an Image: Demonstrate how to: <ul style="list-style-type: none"> • Insert an image from a folder • Copy an image from another document • Resize the image (particularly where very large images are inserted, which need to be moved to find the corner) Show the children that it is important to retain the aspect ratio of pictures by resizing from the corner, not the sides. |  |
|  | Your Presentation: On the new presentation the children opened at the beginning of the lesson, ask the children to insert and copy images and resize as appropriate. Once they are confident with this, ask them to open their presentation and put relevant images onto each slide. The children could continue with their text and save their file. |  |
|  | What looks good? In pairs, ask the children to evaluate how well each image is laid out on the page and suggest any alterations. |  |
|  | Share: Choose one or two pairs to review the layout of the images. Look at some presentations where images and text are used and look at the layouts. Two examples are suggested on the slide and are included in the pack. |  |

Taskit

Challenge: Use the **Challenge Cards** for extension activities.

Teaching slides

Laptops

To reorder slides and present a presentation.

Prior Learning: Children will have used copy and paste to insert an image in to their own presentation in lesson 4.

Learning Sequence

| | | |
|---|---|---|
|  | Can you reorder? Ask the children to reorder a set of story cards or sequencing activity. |  |
|  | Reorder Slides/Presentation Mode: Demonstrate how to reorder slides, using the Slide Sorter View (available in PowerPoint) or in the Slides Sidebar and then the different ways to present a presentation (if you have a computer connected to a screen and a projector, or 2 screens, it's worth exploring the different options available to play the presentation). |  |
|  | Reorder This Presentation: Give the children a presentation to reorder, and then to use the different methods to present. Complete Your Presentation: Ask the children to complete their presentations, reorder their slides if necessary. |  |
|  | Share: Children work together as pairs to review their presentations and suggest any improvements. |  |
|  | Improvements: Give the children more time to complete and then practice presenting their presentations. |  |
|  | Which skills? Choose some presentations and ask the children to present them to the class. Consider the skills that have been learnt in this unit. With which skills do the children feel confident, and which do the children feel they need to practice. Search: Does anyone now how to search for a file on their computer? |  |

Taskit

Reorderit: Give the children some (Twinkl) presentations where the slides have been mixed up, for the children to reorder.

Presentit: Present your completed presentation from the lessons to some children or adults in school.

Challengeit: Use the [Challenge Cards](#) for extension activities.

Teaching slides

Lesson Pack

Laptops

To search and print.

Prior Learning: Children will have used copy and paste to insert an image in to their own presentation and reordered the slides in lessons 4 and 5.

Learning Sequence

| | | |
|---|--|---|
|  | Use one of these options to revise the skills from the previous lesson. Can you? (A) Children open a writing and painting application side by side. Write name and paint a picture and save both files as "Me" into a new folder called "Side by side" in their own folder. Can you? (B) Children open their presentation from previous lesson alongside a painting application. They choose a picture to paint in the painting application, and save into their folder. |  |
|  | What can we find? Show children how to search for files by file name and date. Can I print please?/Print Options: Ask the children why we need to print and get them to consider the amount of paper wasted by unnecessary printing. Show children the different print options, which are relevant to them. (Print dialogue boxes are not the same for every application, so children need to learn to look for the options they need). |  |
|  | Search and Print: Children search for the files created today and last week. With the files created today, children to look for the different print options: <ul style="list-style-type: none"> Choose a different printer if there is one Print in black and white Print selected pages Print double sided <i>(The children shouldn't actually print the file many times.)</i> |  |
|  | Our Skills: Children to list the new skills in this unit: <ul style="list-style-type: none"> 2 windows on a screen Create folders Save work in folders Search for files Print options Which skills do they find easy, and which need more practice? Who is confident at saving in their own folder? |  |

Taskit

Searchit: Children search for files in their folder.

Challengeit: Use the [Challenge Cards](#) for extension activities.

Teaching slides

Lesson Pack

Laptops
